RE: Docket Number T-02432B-07

Attached for filing please find an original and thirteen (13) copies of revisions to Sprint Communication Company L.P. (Sprint) Arizona C.C. Tariff No. 3.

This filing:

- introduces Toll Free 8YY Transit Traffic Service. This service transports Toll Free traffic originated by a third party that is not an end user or other user of the Company's local exchange or exchange access service through its wire center to an IXC customer. The connection can be either directly or indirectly connected.
- clarifies how local switching rates are applied to customers. The tariff currently has the same rate whether the customer is directly or indirectly connected. The proposed tariff changes separate the offering and provides a lower rate if the customer direct connects.
- clarifies which components are applied to each Switched Access Service. These changes do not impact customer rates, terms or conditions.
- makes minor text changes in the Toll Free Database Access Service Description.

Sprint respectfully requests an effective date of October 1, 2009.

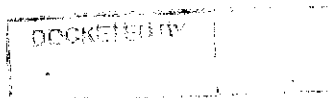

If you have any questions or need additional information regarding this filing, please call me.

Sincerely,

Ann Thompson
Arizona Corporation Commission
Ann Thompson

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.2 Rate Categories (Cont'd)

(A) Switched Transport (Cont'd)

(4) Chargeable Optional Features

(a) Multiplexing

Multiplexing provides for arrangements to convert a single higher capacity or bandwidth circuit for bulk transport to several lower capacity or bandwidth circuits. Multiplexing is only available at Company designated Hubs (end offices) arranged for multiplexing or at the access tandem trunk on the serving wire center side of the access tandem. All Types of multiplexing may not be available at each Hub location.

Listed below are the multiplexing arrangements offered with switched access.

(1) DS3 to DS1

An arrangement that multiplexes twenty-eight DS1 digital circuits to a single DS3 digital circuit at rate of 44.736 Mbps, or multiplexes a single DS3 digital circuit at a rate of 44.736 Mbps to twenty-eight DS1 digital circuits.

The rates and charges for multiplexing are located in section 8 following.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.2 Rate Categories (Cont'd)

(B) Local Switching

The Local Switching rate element provides for the use of end office switching equipment for the termination of end user lines in the local end office, and for the termination of a call at a Company operator or recording.

(1) Direct Connect

This is a Composite rate and is comprised of the following rate elements: Common Carrier Line (CCL) and End Office Charges which include Local Switching and Common Trunk Port.

(2) Indirect Connect

This is a Composite rate comprised of the following rate elements: Common Carrier Line (CCL); End Office Charges which include Local Switching and Common Trunk Port; Tandem Switched Transmission, which include Tandem Transport Termination (fixed), Tandem Transport Mileage (per mile); and Common Transport Multiplexing.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.2 Rate Categories (Cont'd)

(C) 900 Access Service Nonrecurring Charges

The 900 Access Service nonrecurring charge is assessed depending upon how the service is ordered:

- (1) If the service is ordered to only one end office performing six digit screening, the customer charge for the assembly of route tables is assessed for each end office subtending the access tandem. A second nonrecurring charge element applies per NXX activated or deactivated, times the designated Company end office(s) modified to perform six digit screening for 900 Access Service. This option can be applied repetitively to different tandems to customize the intended offering area.

The route pattern nonrecurring charge applies only once, on the customer's initial request to the Company for 900 Access Service for each end office

(D) Toll Free Database Access Service (TFDBAS)

The Toll Free Database Access Service (TFDBAS) Database Query Charge will apply for each TFDBAS query received at the Company's Toll Free SMS800 database. Per query charges will be accumulated over a monthly period and billed to the customer on a monthly basis.

(E) Interconnection

The Interconnection rate element is assessed upon all customers for interconnecting with the Company's switched access network. The interconnection charge is usage rated and applied on a per access minute basis.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.2 Rate Categories (Cont'd)(F) Toll Free 8YY Transit Traffic Service

Toll Free 8YY Transit Traffic Service is an access service in which the company transports Toll Free traffic originated by a third party that is not an end user or other user of the Company's local exchange or exchange access service through its wire center to an Interexchange Carrier Customer. The connection can be either directly via a Direct End Office Trunk (DEOT) from the company's switch to the IXC or indirectly via another LEC tandem switch.

(1) Direct Connect

This rate is in addition to the Toll Free Database Access Service described in Section 6.2.2. Toll Free Transit Service Direct Connect provides for the use of Tandem Switching; and appropriate portions of Tandem Switched Transmission, which includes Tandem Transport Termination (fixed) and Tandem Transport Mileage (per mile); and Common Transport Multiplexing.

(2) Indirect Connect

This rate is in addition to the Toll Free Database Access Service described in Section 6.2.2. Toll Free Transit Service Indirect Connect provides for the use of Tandem Switched Transmission, which includes Tandem Transport Termination (fixed) and Tandem Transport Mileage (per mile); Tandem Switching and Common Transport Multiplexing.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.3. Ordering Options and Conditions

Switched Access Service is ordered under the Access Order provisions set forth in 5 preceding. Also, included in that section are other charges which may be associated

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.2 Toll Free Code Database Access Service (TFDBAS)(Cont'd)

(A) Description (Cont'd)

Unless prohibited by network considerations (e.g., different dialing plans), the customer's Toll Free Database Access Service (TFDBAS) traffic may, at the option of the customer, be combined in the same trunk group arrangement with the customer's non toll free database switched access traffic except as follows. Combining Toll Free Database Access Service traffic with the customer's direct routed switched access traffic will be allowed only when the end office is equipped to perform the toll free database query. When required by network considerations, a separate trunk group must be established for Toll Free Database Access Service.

(C)
|
(C)
(C)
(C)

When Toll Free traffic is combined in the same trunk group arrangement with other traffic, usage for the Toll Free Database Access Service traffic will be aggregated with the other traffic for billing purposes. When separate trunk groups are provided for Toll Free Database Access Service, usage will be provided separately.

The Federal Communications Commission ("FCC") has concluded that hoarding, defined as the acquisition of more Toll Free numbers than one intends to use for the provision of Toll Free service, as well as the sale of Toll Free numbers by a private entity for a fee, is contrary to the public interest in the conservation of the scarce Toll Free number resource and contrary to the FCC's responsibility to promote the orderly use and allocation of Toll Free numbers.
